

AQABLASTA[®]

US Patent

New concept new blasting machine

SWING BARREL type

This system consists of high-speed wheel for blasting water mixed with media.

The works in a barrel are blasted by mixed water and media.

Separated media are carried back by slurry pump then re-used continuously.

Sludge water is condensed then cleaned water is recycled in machine.

AQABLASTA is easy operation and wide using wet blasting machine

AQB-SB40 (40 little)

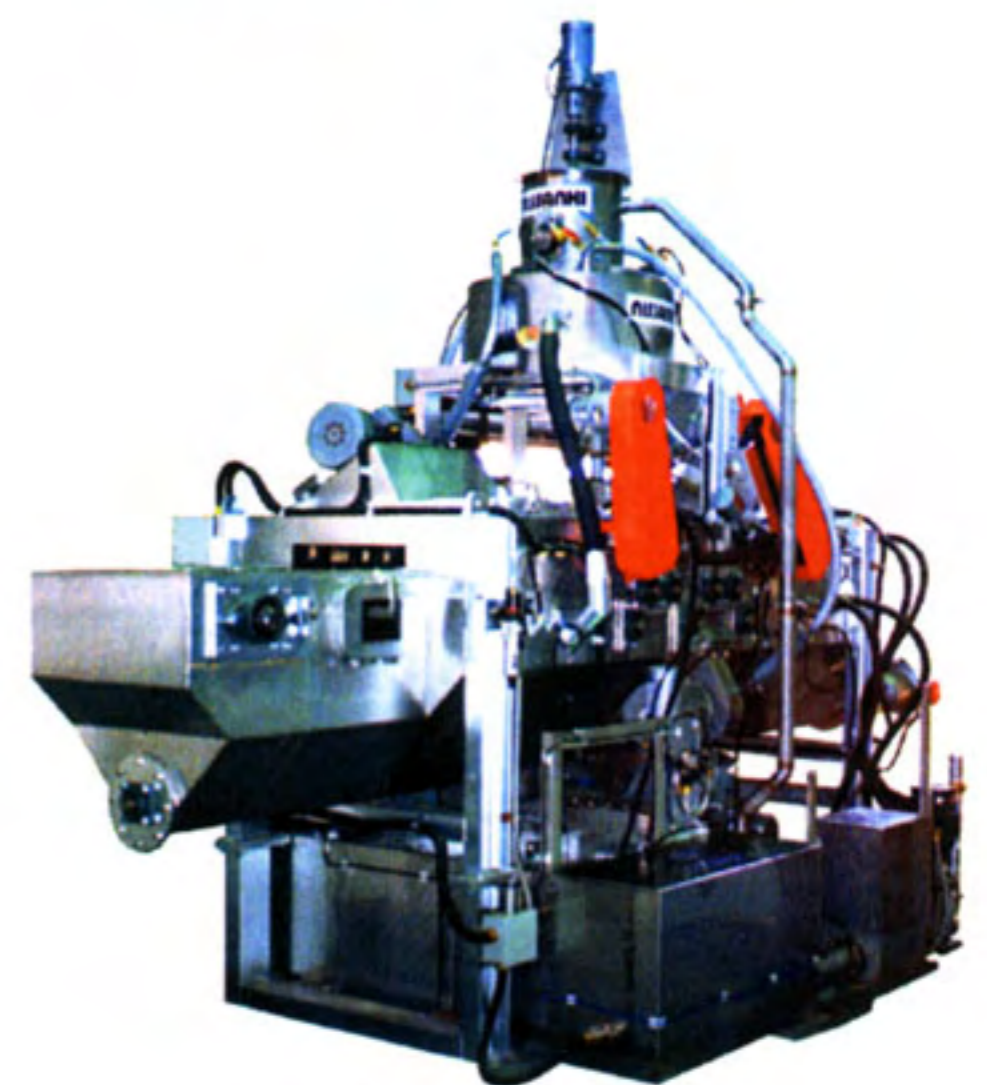

It's next generation

Blasting machine

Compact

Clean

Simple

AQB-NC45-3-4B

Application

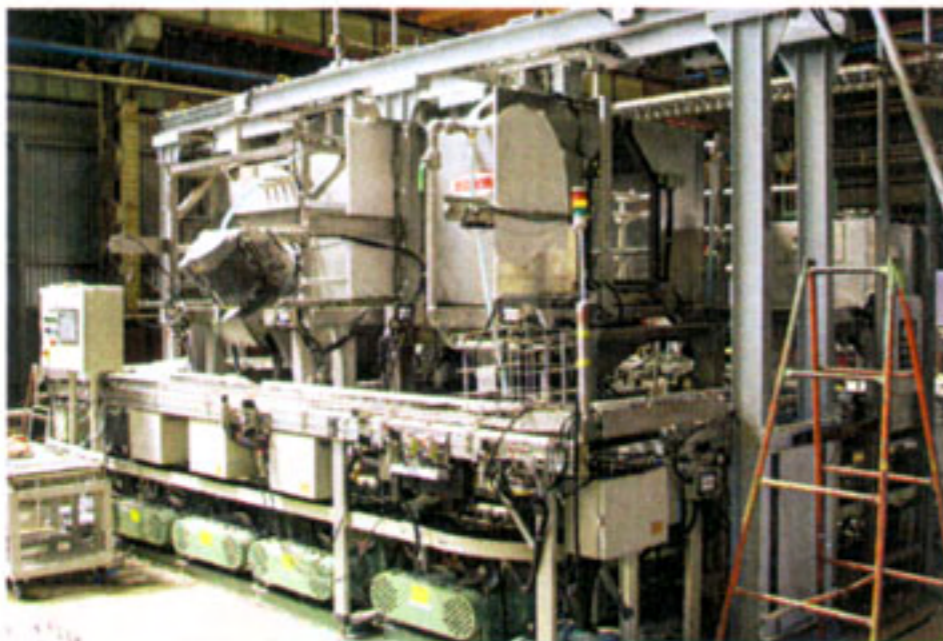

- *Wash and blasting for all works
- *wash automotive electric parts
- *washing off the coating sputtering jigs
- *Washing sticking paint off the coating tools or jigs
- *De-burring for all molding works
- *Na-no surface abrasion for all works

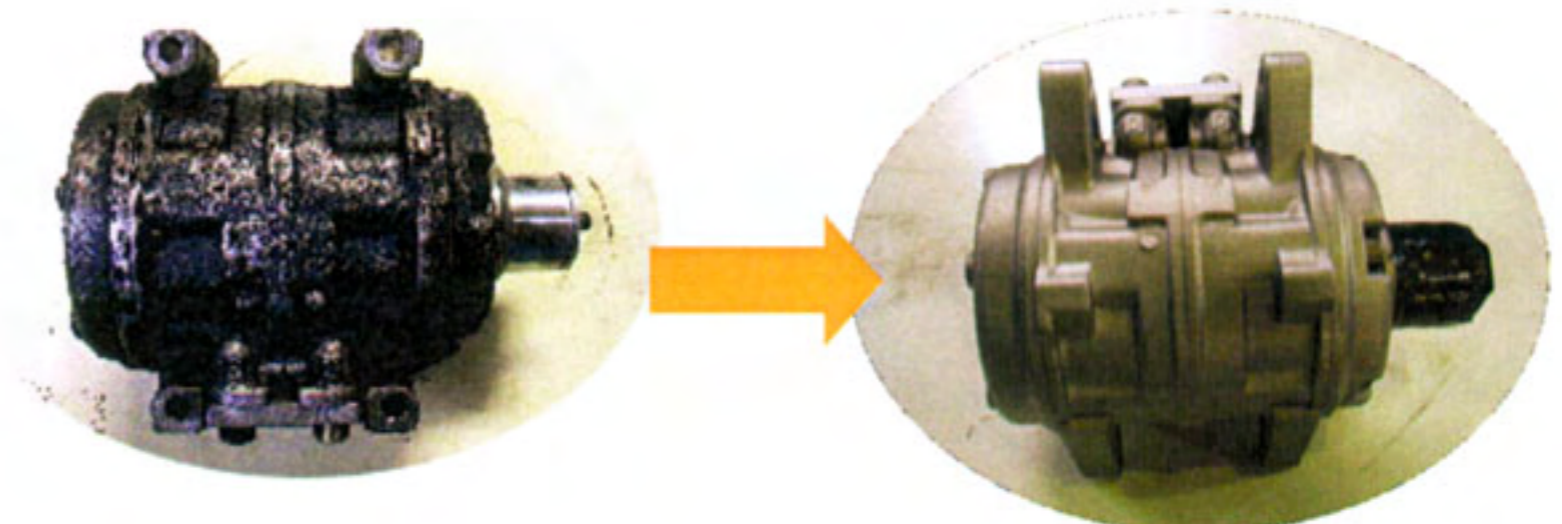

Chemical coating line

Abrasive and washing works

Sputtering jigs washing line

Re-manufacture
